Daniel Smith Watercolor Ground Mars Black 118ml 4fl.oz

£7.49 £6.74

An excellent ground for watercolour on all surfaces. Absorbent surfaces: Canvas, paper, plaster, hard board. Non-Absorbant surfaces: glass, plastic, metal - for best results these will need to be abraded before application of the ground. Thick, brushable and heavily pigmented. Allow 24-72 hours to cure before applying Watercolour or Acrylics. Can be thinned up to 10% with water. This ground gives a surface similar to a cold pressed paper surface (NOT surface) and can be used for corrections to watercolour as well!
